

**Part-Time Patient Care Specialist – Orthopedic & Therapeutic Footwear Boston  
Pedorthic | Brighton, MA | Part-Time | \$18-20/hour**

**Are you a people person who loves learning new things and takes pride in doing them well?**

This might be the most interesting healthcare job you've never heard of.

Boston Pedorthic Associates is a specialty orthopedic practice in Brighton helping patients with diabetes, arthritis, and mobility conditions live better on their feet. We fit therapeutic footwear and custom orthotics — specialty patient care work that combines hands-on clinical support, orthopedic technique, and real patient relationships. Our patients are complex, loyal, and grateful. Our team is small, energetic, and expert.

We're not looking for someone who already knows pedorthics. Nobody does when they start. We're looking for someone motivated enough to learn it — and personable enough to make patients feel at home while they do.

**What you'll do:** Provide direct patient care under the supervision of a board-certified pedorthist — patient assessments, therapeutic footwear fittings, orthotic modifications, EHR documentation, patient education, insurance verification, and appointment scheduling. Real patient relationships, not a waiting room assembly line.

**What you'll learn:** How orthopedic foot mechanics can prevent serious complications like amputations in diabetic patients. How to make sure patients who qualify for Medicare and DME benefits actually get them — because navigating that system well is how we advocate for the people who need us most. How to perform precision orthotic modifications using clinical tools. The full scope of a specialty orthopedic practice that most healthcare workers don't know exists.

**Two career paths forward — you choose:** Some team members grow into clinical expertise and pursue board certification as an ABC Certified Pedorthist (C.Ped.) — a recognized orthopedic credential. Others grow into specialty practice management — the operations, insurance, Medicare billing, and business side of a healthcare practice. Both paths are real and both are supported.

**What we provide:** Complete on-the-job clinical training. Full financial sponsorship of your ABC Certified Fitter-Therapeutic Shoes (CFts) certification — we pay for the training course and the exam. HIPAA-compliant clinical environment with experienced board-certified pedorthists.

**What we're looking for:**

- Upbeat, can-do attitude — our patients feed off your energy
- Warmth and patience with elderly, diabetic, and medically complex patients
- Curiosity — you want to understand why, not just go through the motions
- Precision and attention to detail in hands-on clinical support work
- Reliability — our patients count on us showing up
- High school diploma or equivalent; associate's or bachelor's appreciated
- Bilingual candidates (Spanish, Portuguese, or other languages) strongly encouraged to apply

**You may have background in:** Medical assisting, patient care, fitness, personal training, athletic training, orthopedics, caregiving, home health, DME, retail, or customer service. We care more about who you are than where you've been. Entry-level candidates with the right attitude are welcome.

**What we offer:**

- \$18-20/hour
- 16-20 part-time hours/week, flexible scheduling
- Full paid certification sponsorship (ABC CFts training + exam)

- Career pathway to ABC Certified Pedorthist (C.Ped.) or practice management
- Meaningful orthopedic specialty work in a supportive small team
- Brighton, MA location — convenient to public transit

*Boston Pedorthic is an equal opportunity employer committed to building a team that reflects the diverse communities of Brighton, Allston, and greater Boston that we serve.*

**Apply:** Send resume and cover letter to [info@bostonpedorthic.com](mailto:info@bostonpedorthic.com)
