Energy Infrastructure Academy

About Our Academy

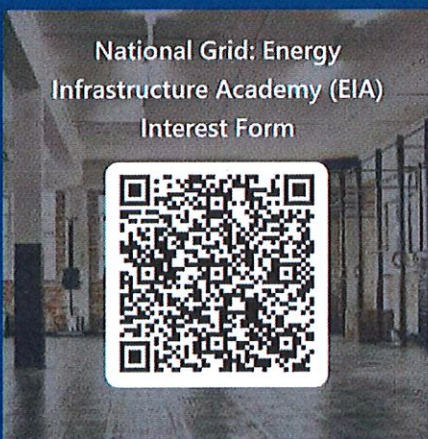

Find your superpower with National Grid! We are pleased to launch National Grid's New England Energy Infrastructure Academy **to prepare you for entry-level, full-time, union roles.** Our Workforce Development team will provide you with training, career readiness, and connections to competitive union roles in Massachusetts at National Grid.

Program Details

The purpose of the Energy Infrastructure Academy (EIA) is to prepare candidates from underrepresented backgrounds for entry level to mid-level union roles with National Grid, an international energy company. The Summer 2025 cohort begins **Monday, September 29, 2025**, in Boston. Over ~200 hours, participants will develop a combination of technical and soft skills, hands-on job experience with National Grid staff, networking and mentorship, in preparation for full-time union role opportunities with earn-while-you-learn on the job training. Graduates also receive a registered pre-apprenticeship certificate from the Division of Apprentice Standards.

Locations:	Hours:	Benefits:	Length:
Boston	8:30am – 3pm EST	Up to \$2,400 throughout the duration of the program	Total commitment of ~200 hours, Boston (8 weeks: September-November 2025)

Apply today to the EIA
Application deadline **9/15/25 Boston**

To apply, use the QR code or link:
<https://forms.office.com/r/YcRxEwKjzy>

We envision a future where 51% of union roles will be held by women and 30% by people of color.
